

Doran Printing Checklist

Images

Make sure all placed colour images are setup in CMYK colour space

Black and White images are Grayscale or bitmap.

Images can be supplied as TIFF, EPS, JPEG.

GIF files are not accepted.

For best results, your image needs to be at 300dpi at output size.

Bleed

Please ensure there is a 3mm bleed around all artwork where required.

Accepted Files

Doran PDF Express files.

Adobe Press Ready PDF files. Please be sure to include bleeds and crop marks.

We also accept files from any of the standard Desktop Publishing applications:

InDesign

Quark Express

Illustrator

Freehand/Corel - Exported as an AI file, with fonts converted to outline.

Microsoft Word or Publisher - Please contact us to discuss your requirements if using these programs.

Supplied Artwork

Our PDF software automatically embeds fonts. If you are supplying PDFs created using Distiller, please ensure all fonts are embedded.

If supplying native artwork, please ensure all fonts and images are included with your job.

Delivery Of Files

We prefer PDF files be delivered using our software as they are automatically delivered from your desktop to us.

Alternatively, you can contact us for FTP details, upload your file through our website, or email your artwork. We also accept jobs via CD and DVD.

Doran Printing Checklist

Things to look out for...

Line stroke width

0.25 point is the minimum recommended line stroke width when printing with Doran Printing.

Transparencies

Please ensure all transparencies are flattened when supplying your artwork to Doran Printing. Our PDF software creates a v1.3 PDF which will do this on your desktop. If using Illustrator, please use the High Resolution option when flattening transparency.

Colours

Please remove any unused colours from your files. any colours which are to be printed in CMYK, please make sure they are converted from spot colour to CMYK, otherwise your job may not print correctly.

Images

Please make sure all images are placed as CMYK or Grayscale and are at a minimum of 300dpi at output size.

If the information you require is not covered here, please contact Doran Printing directly on 03 9587 4333 and we will assist you.
